

What's NEW on the latest SAFE 9.0 release?

1. **Main Menu:** A new main menu organizes all your daily tasks in an easy to view and efficient manner.
2. **Main Tabs:** These have been organized to give you maximum performance and detail. A handy customer listing is located on the *Main* tab and allows you to instantly go to a desired customer's menu when double clicked on. The tabs that are not pertinent to your *Company Type* will not appear once the program is initially installed. *Example: If you are not a Rental Company, the Rentals tab will not appear.*
3. **Utilities:** Your "Utilities" like *Master Files, Networking, License Info, and Backing Up Data* are located to the bottom left-hand side of the screen.

4. **Inspection Scheduling Option Addition:** In addition to the options of scheduling your next inspection off of the *Contract Start Date* or *Previously Scheduled Date*, we have added the ability for you to reschedule the customer's *Next Inspection Date* based off of the *Actual Date* the Inspection was completed.

What's NEW on the Customer Menu?

The screenshot displays the 'SAFE Customers' software interface. On the left, a sidebar (1) contains alert icons for 'Residential Account', 'Active Contract', 'Contract Past Due', 'Inspection Past Due', 'We add Chlorine', 'Active Alarm Contract', 'Call First Customer', 'Warranty Expired', and 'Pump-Out Needed'. At the top, a search menu (2) includes 'Name Search', 'Address', and 'More Search Types'. The main area shows customer details for Jack Thompson, including address, phone numbers, and service options. On the right, a sub-menu (3) lists various options: 'SAVE / EXIT', 'Customer Profile', 'Daily Notes', 'Documents', 'INVOICES' (4), 'Onsite Inventory', 'Main Maps Menu', 'Proposals', 'Pumping/Tanks', 'Rentals', 'Remote Alarms', 'Septic Contract', 'Septic Inspections', 'System Profile', 'System Specs', 'Work Orders', and 'CANCEL / EXIT'. At the bottom right, viewing options (5) include 'Details', 'Inspections', 'Tanks', and 'Rentals'.

1. **Alert Icons:** These were added to the left side of the customer menu to help the user see important dates and details without having to go into sub-menus for that customer. These icons only show when they are needed. *Example: The Inspection Past Due icon and date will show once that customer's inspection date is Past Due. It will not appear if that Inspection is NOT Past Due.*
2. **Search Menu:** The addition to *Search by Address* will help speed up locating your customers. You can still search by *Street Number* and *Street Name* in the *More Search Types* sub-menu.
3. **Sub-Menu Arrangement:** The sub-menus have been arranged *ALPHABETICALLY* and organized to the far right-hand portion of the *Customer Menu* for a more precise and clean look.
4. **Invoices Sub-Menu:** All financial information (except *Proposals*) have been consolidated into a sub-menu called *Invoices*. A "spreadsheet" listing of *Open Invoices* has been added to the *Invoices* sub-menu for instant feedback.
5. **Viewing Options:** Now you have the option to view several areas of your customer's information quickly without having to click into any sub-menus. View general *Details*, *Inspections*, *Tanks*, or *Rental* information. If your company is not a rental company, however, the rentals option will not be visible, making it less cluttered for your viewing preference.
